Critical Access Ramp Program Component Quote & Estimating Work Sheet

All Components to be of PT Lumber except handrails, and meet the Maine Uniform Building and Energy Code (MUBEC) requirements for construction and installation as a temporary structure. Temporary ramps (without footings) vary in length therefore various components may be required. This worksheet uses the typical number of components to complete 12-15 ramps

A) Large Landings (5'x8')

Suggested Materials per component

Material Cost: \$
Cost to fabricate: \$
Total cost a piece: \$
Total cost for 9: \$

B) Small Landings (5'x5')

Total Material Cost: \$
Cost to fabricate: \$
Total cost a piece: \$
Total cost for 9: \$

C) Short Ramp (5' x4')

Total Material Cost: \$
Cost to fabricate: \$
Total Cost a piece: \$
Total cost for 11: \$

D) Long Ramp (10'x4')

Total Material Cost: \$
Cost to fabricate: \$
Total cost a piece: \$
Total cost for 45 \$

E) Wedges (5'x4' sloped)

Total Material Cost: \$
Cost to fabricate: \$

Total cost a piece: \$

Total cost for 15: \$

Grand total all components \$

Additional costs may include:

Travel Time (includes 30 minute per day/ person adjustment)

Mileage (includes 30 mile per day per vehicle adjustment)

Material Cost for: Railing & Supports/Site-Built Extensions/Etc.
